IP Consulting
INTEGRATEUR DE RESEAU ET TELECOM

Intelligence Behind ICT

IP Consulting is working to find ways to use ICT in the context of a better functioning of the business of its customers. We transform your ambitions into accomplishments.

We will help you to meet the current challenges with services, relevant and targeted IT solutions. We will ensure that your company has a solid platform for networking and help you optimize the performance and availability of collaboration tools and unified communications, including technology's workstation and call centers. We can also help you develop a next-generation data center; support your transition to cloud computing, and to ensure that all elements of your infrastructure are secure.

This set of services is based on a full lifecycle of IT services that include counseling services, professional, support, managed services, procurement, supply chain and IT outsourcing. This approach ensures a stable but flexible technology park, ideal for understanding the changes with confidence.
